

DAY DREAMING (continued)

Horizon Power Catamarans

Horizon Power Catamarans celebrated its 15th anniversary in 2024 and as part of the celebration, the company's latest model, the PC68, will be making its first appearance at the Fort Lauderdale International Boat Show. The PC68 (68' LOA, 24' 6" beam) leads the multi-hulled Powercat (PC) range, which spans from the entry-level PC52 to the PC74. The ultra-spacious PC68 is available in Open Salon or On-Deck Master configurations. The model features a four-stateroom layout and a fully equipped flybridge with a unique Portuguese-style seating area on the upper deck. All new PC models are now equipped with an advanced Victron phosphate battery package paired with a Termodinamica variable speed AC system, which affords up to 20 hours of generator-free comfort at anchor. The yacht has twin 850-hp MAN engines and a 1,500-gallon fuel tank, providing worry-free travel to the owner's favorite destination. horizonpowercatamarans.com
